

The Forensic Report

The report for this experiment will be written in a format similar to what TBI uses. A template for the report may be downloaded from the Chem 3221 website. The following information is to help you in filling out the form.

[Address], [Phone] and [Fax]: Just make them up.

To: The report should be sent to Dr. Lawson.

Date Issued: This is the date you are sending the report.

Lab Case Number: For this experiment, the lab case number is 322106

Received from: List the agency or doctor that submitted the sample.

Received by: You?

Date/Time received: The first day of the experiment

Sample #: Identification of sample

Sample Type: Describe the physical properties of your initial sample.

Collected: All samples in this experiment were collected in the emergency room. See the cover letter for more info.

Substance: This is where the "meat" of the report is. Consider this like a results/conclusion of a regular lab report. Thus, identify your unknown and justify your identification with the data collected over the three weeks. Explain the interpretation of the results of all tests run.

Make sure to sign the report and attach copies of your spectral data. Remember to turn in your data sheets as well.
