SmarterMeasure Readiness Ranges

Please note: This information is being shared to provide clarity on the information the instructor is provided compared to students. No action is required. This is for informational purposes only.

Students receive a numerical score from 0 to 100 on their readiness report. These numerical scores are translated into color-coded readiness ranges for instructors. These color-coded ranges are not viewable to students. The color-coded readiness ranges are intended to assist instructors in identifying at-risk students at a glance. A blue icon indicates a high degree of readiness, green a medium degree of readiness, and red a low degree of readiness.

Instructors can access their student’s readiness ranges by selecting the link to the SmarterMeasure Assessment in the APSU 1000 course in D2L. Students must have completed the assessment before their information will populate.

Here is an example of the instructor dashboard with the color-coded readiness ranges.

The readiness ranges are pre-determined by SmarterServices, LLC based on their many years of research and data collection on student readiness.
