

# Putting Research into Practice: Infusing the Science of Learning into Your Teaching

Cindy Nebel & Megan Sumeracki

*APSU, Clarksville, TN, August 11, 2025*

## Questions

For quick clarification questions, please stop us and ask!

For other questions, please use the QR code to submit prior to the Q&A at the end.

Please submit each question individually (multiple submissions welcome).

## Ideas for Implementation

Ideas for Implementation: \_\_\_\_\_

(write in a strategy above)

*Have you used the strategy/strategies in the past? If so, how?*

### **Brainstorm:**

*What are ways you would like to implement the strategies in your teaching in the future?*

*What are some potential challenges to the implementation ideas you came up with?*

*What are some solutions to these challenges? Are there resources you would need?*

## Ideas for Implementation

Ideas for Implementation: \_\_\_\_\_

*What are ways you would like to implement the strategies in your teaching in the future?*

*What are some potential challenges to the implementation ideas you came up with?*

*What are some solutions to these challenges? Are there resources you would need?*

## Reflection

Think about all of the strategies you have learned about today and come up with things that can be implemented in your classrooms moving forward. What ideas for implementation did you have that you want to actually do?

*What could be implemented right away?*

*What implementations will require longer-term planning and resources?*

***What is the one thing that you are going to do when you leave this workshop today? In other words, what is your top priority implementation?***
