New Academic Program – Final approval required from SACSCOC

1. BS Aviation Science with Rotor-Wing concentration Implementation Fall 2017
 - a. Helicopter Aviation program teaching individuals how to safely fly helicopters, navigation techniques, meteorology concepts necessary for flight navigation and prepare students to sit for FAA certification.

APSU had previously proposed an AAS in Aviation Science with a concentration in Professional Rotor-Wing Pilot program. During the external review conducted by THEC, APSU was asked to consider proposing a Bachelor of Science degree in Aviation Science with concentration in Rotor-Wing in lieu of the AAS degree. APSU had planned to propose a bachelor's degree after the associate degree was implemented.

This email contains the proposed Bachelor program requirements, prepared by John Byrd, Jaime Taylor and Karen Meisch.

The proposal passed with 11 ayes. Six individuals did not respond via email.
