

MHA INTERVIEW QUESTIONS

I think the interviews went more smoothly when we did not rotate and have listed the questions now in the order we ask them, by person. I understand we have varied from these slightly and there are often follow up questions.

Blake

First: I will introduce everyone and ask each committee member to describe their duties, experience, etc “a little bit about them:”

Followed by asking the student to “tell us why you should be chosen for our program and how you will make a difference?”

Melissa

Second question:

This could be about their role in healthcare, though most candidates did explain during their pre-interview questions... (Melissa, I know you have “flexed” this question, which I think is good, depending upon pre-interview responses.

Third question:

If you were given a task/assignment that you felt uncomfortable or unfamiliar with or not even knowing where to start, what would you do?

Greg

Fourth Question:

Graduate school is a significant time commitment. How do you plan on making reconfiguring your current schedule to accommodate the workload?

Fifth Question:

How do you manage your priorities to meet deadlines?

Tim:

Sixth Question:

What types of projects have you completed during your education?

Seventh Question:

What have you enjoyed most about your education up to this point?
