

Stakeholders' Feedback:

Name:

Please provide a general impression of APSU MHA Mission Statement:

Are there any statements that need to be added?

Is it clear?

Is it compelling?

Please respond similarly to the vision statement:

Are our values clear and well written?

Do our values appear aligned with our mission and vision? If not, how could we better align them?

Do our goals align with our mission statement? Are they clear and measurable?

After reviewing the elements from the CAHME criteria review worksheet (on the "guide" attachment - the items in the table, what could we do with our mission statement to better respond to the review elements?

Any final comments/suggestions?
