

## **SPEECH-LANGUAGE PATHOLOGY**

Today's screening is NOT a formal or comprehensive evaluation of speech-language or hearing. There is NO substitute for an evaluation performed by a certified speech-language pathologist or audiologist. Today's screening will give you descriptive information about what your child was able to do (observed or per your report) or identify risk for hearing loss. Today's results cannot be used to qualify for speech-language therapy or other service delivery. Screening results can identify when a referral to a professional is warranted.
