			<i>Total [Semester Hours]</i>		<b>16(+1)</b>

**\*\*Must be admitted to the School of Nursing to begin nursing courses.**

Many NURS prefix courses contain a clinical component which constitutes a designated number of the total course credit hours. Designated clinical credit hours may be found in the course description section of the University Bulletin. Student credit hours are described as follows: one (1) theory credit hour equals fifty (55) contact minutes each week throughout the semester. One (1) clinical credit hour equals 110 contact minutes each week throughout the semester.

**Curriculum is full time for pre-licensure students. RN-BSN degree completion students may select a part time curriculum option.**

#### Progression

A grade of "C" or better is required to pass any nursing course and to progress in the curriculum. When a course has a clinical component, the student must pass both the theory and the clinical component in order to pass the course. The policy on progression is available from the Director of the School of Nursing
