

**1. TEMPORARY FENCING AND BARRIERS**

1.1. Contractor shall be solely responsible for erection and maintenance of temporary enclosures and barriers as approved by the Office of Facilities Planning and Projects.

- 1.1.1. Unattended open excavations deeper than 6" shall be completely enclosed with a minimum 6'-0" high chain link fence, and posts driven securely into the ground or ballasted platform fencing.
- 1.1.2. Plastic barrier fencing a minimum 4'-0" high may be used for traffic control provided it is properly secured with driven stakes and secured at the top, middle and bottom of the fence. Plastic barricade fencing shall not be used as a barrier around unattended open excavations listed in 1.1.1.
- 1.1.3. Warning tape shall not be used in lieu of chain link and plastic barricade fencing on unattended sites.
